

AQUAFLEX

Code: AM1008
OPAQUE BASE AND WHITE

Ink PVC and phtalate free for light and dark fabrics. Available white and opaque base.

GENERAL CHARACTERISTICS

- Creamy paste for easy printing
- High opacity on dark fabrics
- No tack
- No dry in the screen
- Water soluble

PREPARATION

Ready to use. It is possible to mix colours to obtain pantone shades. TACK FREE and NO-DRY formulation for fast shearing action allows printing through a range of mesh counts without the need for reducing the viscosity, however, you can obtain a softer hand by lowering the viscosity with water. Too much adding of water can compromise the covering.

PRINTING

To obtain best results use screens 34-90 threads/cm both for manual printing and automatic.

POLIMERIZATION

To obtain high washing resistance put in the oven at 160°C for 2-3 minutes.

THINNER

TEXPRINT ADDENSANTE M

Thickening agent (add 0,5-3%)

TEXPRINT CATALIZZATORE UNIVERSALE

to increase washing resistance (add 1-5%)

TEXPRINT RITARDANTE GEL to slow drying on the screen (add 5%)

TEXPRINT ADDITIVO S to slow drying on the screen without reducing the viscosity (add 5%)

TEXPRINT AL

To avoid transfer of the metallized foil (add 15%).

TEXPRINT NO TACK

To obtain more opacity and softer touch (add 15-20%).

TEXPRINT ADDITIVO E
elastifier (add 5%).

CLEANING

Wash tools with water and soap.

PACKING

5 – 20 KG.

NOTE

Before to use the ink in production, we suggest to make some test in order to evaluate if the product satisfies the requirement. AQUATEX completely free from PVC, PHTALATE and FORMALDEIDE, needs a proper environment for the mixing so that they do not come in contact with other inks that could pollute it, therefore we suggest to use equipments, drums etc. new or well cleaned.

A.manoukian srl gives the a/m suggestions as guidelines for the customer and assumes no liability direct or indirect for any improper use. It is the user's responsibility to determine the suitability of the product to the intended use according to his working conditions.
